

## Amendment VC221

### Gas Connection to Subdivisions

---

Amendment VC221 came into effect on 4 August 2002. This amendment facilitates all-electric developments to support implementation of Victoria's *Climate Change Strategy 2021* and *Gas Substitution Roadmap 2022*.

The amendment changes the *Victoria Planning Provisions* (VPP) and all planning schemes by amending clauses that require developments to be connected to reticulated gas, it also amends the requirement for statutory referrals.

As a result of the new referral requirements, Council is now requiring applicants/developers to indicate whether a development is to be connected to reticulated gas at the time of subdivision. This will assist Council in determining whether a referral to the relevant gas authority will be required.

Please complete the information below and upload a copy of this form as "Other Document Type" with your application in SPEAR.

Property Address	
Plan of Subdivision Number	
SPEAR Reference	

Place a tick  against the appropriate option below.

The development within this subdivision **WILL** be connected to reticulated gas

The development within this subdivision **WILL NOT** be connected to reticulated gas
