

Preparing for construction

You'll start seeing more activity and workers in the area as we continue to carry out works across the site.

Our civil contractor Joslyn, is currently working on earthworks, drainage, retaining walls and a pavilion pad.

Following this, construction for the new sports pavilion and community space can start. The project group has recently appointed Ausco to undertake this work.

Works have been progressing well and in line with the anticipated program. A slight delay has occurred as a result of the temporary Victorian Government-directed construction shut down.

Works are progressing on the new entry roads and car park (from Dallas Drive), and are programmed for completion in January 2022.

Community update

As part of the project outcomes, we're progressing our commitment to support grassroots rugby league. Council has entered into a community services program with the project partners to deliver sport and community development programs for young people. We look forward to keeping you updated on this.

We're excited to announce that Seabrook Reserve will introduce touch football as a new summer sport for our Hume community to enjoy! This is a great opportunity for our community to connect and participate in sport in the rugby league off-season.

This project is delivered in partnership between Hume City Council, Victorian Government, NRL, Melbourne Storm, NRL Victoria and Touch Football.

Goodbye to the old pavilion.

Preparing the area for retaining walls around the field.

Levelling out the surface to prepare for construction.

Playspace design

1. Climbing rope and boulders

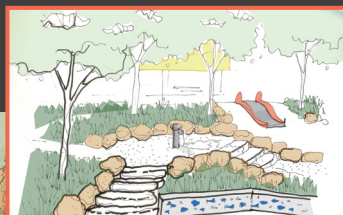

5. Outdoor percussion instruments

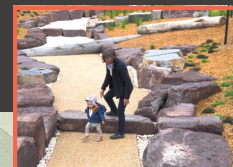

6. Mound slides

2. Trampolines

7. Waterplay tap

9. Rocky stream

13. Double swing

8. Log steppers

12. Basket swing

11. Accessible water play tray

10. Sand and water play

3. Carousel

4. Flying fox

Landscape and playspace design finalised

The design for the Seabrook Reserve landscape and playspace has now been finalised.

The landscape and playspace upgrades will include exercise stations, a picnic area, a playspace and improved landscaping such as paths and planting. The design has integrated community feedback, which identified a flying fox and swings as the most popular play items.

Construction for the landscape and playspace will commence in 2022 and will occur alongside other site construction.

The landscape and playspace upgrade at Seabrook Reserve is supported by the Victorian Government through the Suburban Parks Program.
