

## Construction update

**There's a lot of activity happening onsite as the various elements of the upgraded Seabrook Reserve start to take shape.**

The civil contractors are progressing with field of play construction and pitches one and two have been turfed. The sports lighting for all pitches has now been installed. It's exciting to see this development advance for our community!

The new road and carpark project are programmed for completion at the end of May. When works are complete, this will provide entry from the north from Dallas Drive into the Seabrook Reserve site.

Detailed design is underway for the new pavilion including NRL Victoria's offices.

A contract has been let for the new playspace and landscaping works to the east of the new road entry. Construction is expected to commence in May 2022. The design includes a sports court, exercise stations, playspace, toilets, picnic areas, new lighting and new path connections.

The playspace and landscaping works are scheduled to be completed by the end of December 2022. Once complete there will be an opportunity for the community to contribute to the selection of artwork to be installed on the sports court.

This project is delivered in partnership between Hume City Council, Victorian Government, NRL, Melbourne Storm, NRL Victoria and Touch Football. The playspace and landscape upgrade at Seabrook Reserve is supported by the Victorian Government through the Suburban Parks Program.

## A reminder of what we're doing...

We're upgrading Seabrook Reserve to create a space for the whole community to enjoy and strengthen Rugby League in Victoria.

As a well-loved reserve in the heart of Broadmeadows, Seabrook Reserve will become a space for the community to play, relax, explore and exercise.

The reserve will also include a new training and administration base for NRL Victoria and Touch Football Victoria and will remain the home for local club Northern Thunder.

### Better sporting facilities

Upgrading sporting facilities and building the State Rugby League and Community Centre (pavilion) with female-friendly amenities.

### More open spaces and community facilities

We're installing a new playground, outdoor exercise equipment, picnic furniture and facilities for locals to enjoy.

### Improving access

We're installing public toilets, lighting, parking and local road access to improve accessibility

### Improved walking and cycling tracks

Locals can look forward to improved path connections, a new pedestrian bridge and circuit shared path.

### Environmentally aware design

Creek re-vegetation, local habitat enhancement and water sensitive urban design will be undertaken to improve run off and water quality in the creek.
